Cargo*Stream*™
Insight at the Speed of Commerce

High Throughput Content Visibility

Spectrohm's high-speed screening uses patented radio wave-based technology to detect threats and identify package contents—at the speed of commerce.

> Threats and contraband detection
> Item count
> Leaking containers
> Empty containers
> Content verification
> Fraud detection

Fast. Delivers results in real time.

Smart. Identifies and weighs materials. Reads labels and barcodes. Seamlessly integrates with automation.

Compact. Mobile or in-line. Smaller footprint than X-ray systems.

Safe. Low-power radio waves. No X-ray regulatory or safety issues.

Pilot Program

Spectrohm is seeking industry leaders to pilot this unique technology.
